

ATTACHMENT FOR SMALL SKID STEER LOADER

ABSTRACT OF THE DISCLOSURE

5 A loader has lift arms that are used for
mounting a number of different attachments. The
attachments can be mounted to the rear of the forward
end of the lift arms in order to move the center of
gravity of the attachment more directly over the
10 loader frame. Various types of attachments can be
used, as shown, and can be controlled to be pivoted
for dumping or loading, and can be raised and lowered
on the lift arms.
